INFINITT Smart Router accelerates migration of six million studies from 7-year old legacy PACS

INFINITT Healthcare announced the completion of the world's largest PACS replacement project, with the migration of more than 6 million studies and over 200,000,000 medical images. A PACS migration gateway called INFINITT Smart Router was used to provide fast and accurate transfer of image, patient and report data from the legacy PACS to the new INFINITT PACS solution at Seoul National University Bundang Hospital.

INFINITT Healthcare is a technology leader in the development of web-based RIS, PACS, Cardiology PACS, Mammo PACS and Advanced Visualization solutions, and one of the only PACS vendors to develop its own gateways and migration tools. A key benefit of the INFINITT Smart Router is...

INFINITT contracts for 18-hospital PACS Project in Colombia, S.A.

INFINITT Healthcare has signed a multi-site, multi-phased contract with Medison Econet Corp. (MEC) to provide INFINITT PACS for an 18-hospital PACS Project in Colombia, South America. MEC won a 18-hospital contract with Salud Coop EPS towards the end of 2009, and recently contracted with INFINITT Healthcare to install INFINITT PACS DS (Distributed Server) solution at 18 of the hospitals and their centralized medical data center.

Salud Coop Group is one of the top 10 companies in Colombia as well as the country's number...

At 611 MRI · CT, better integration means fewer steps, more comprehensive patient records

611 MRI · CT is a thriving outpatient imaging service with locations in State College and Altoona, PA. Last Year over 300 of the area's best doctors referred 11,500 studies to 611 MRI · CT, knowing their centers provide advanced technology, experienced technologists, and radiologists with specialized training in MRI.

Their imaging centers also perform Ultrasound, Bone Density, Fluoroscopy and X-ray imaging services, averaging approximately 30,000 procedures per year across all modalities. Prior to implementing the INFINITT RIS/PACS, they had a PACS system but it wasn't web-based and images were archived to an outside vendor..
