### INFINITT offers Multi-site Integration Platform For Unified Reading & Reporting Environment

Healthcare has seen continued consolidation in recent years, with technology being a significant factor in making consolidation feasible. As digital imaging has allowed radiology groups to cover larger geographical areas, we hear more and more frequently about the merging of radiology groups. Often, these mergers are motivated by financial reasons, but they can also infer a competitive advantage as they allow for many sub-specialties to exist within a single practice.

The challenge comes when the newly formed group -- servicing multiple hospitals and imaging centers...
